INVESTOR'S GUIDE

Guide to administrative procedures following to obtain permits, clearances and advice for the recovery of real estate and new construction of industrial (also craft type).

The analysis of public properties available in the Molise region showed two main potential areas of investment:

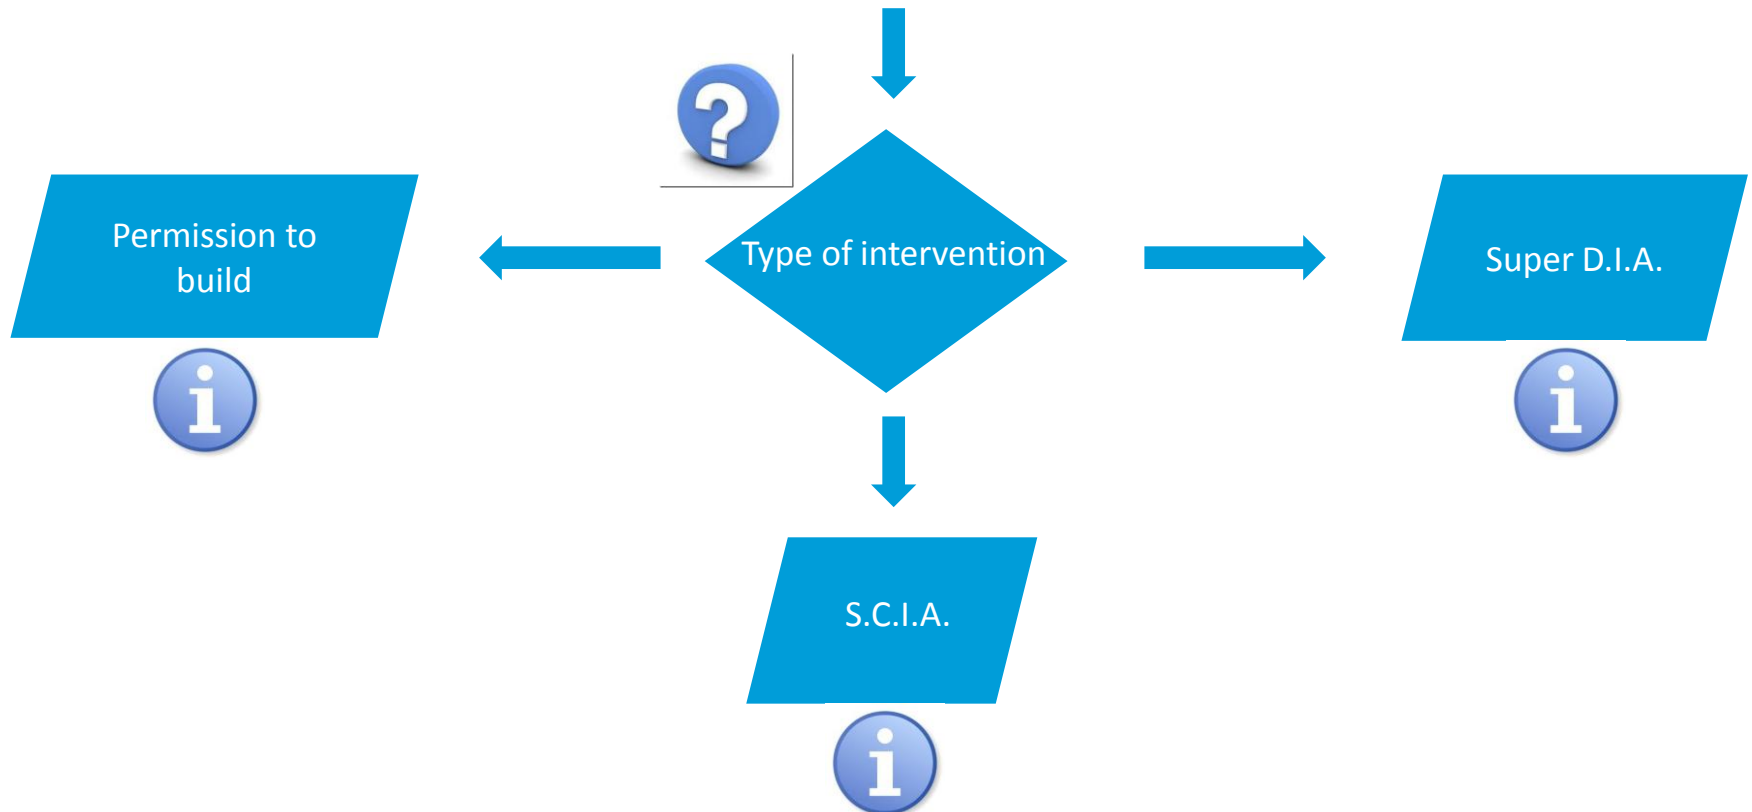

- ✓ Recovery of public property;
- ✓ Acquisition of land for the establishment of productive activities with the new realization of buildings and / or renovation of existing locations.

Below are the two flow charts with the explanation of the procedure for the acquisition of permits, approvals, clearances and advice

PROPERTY TO BE RECOVERED

Funded by European Funds of South East Europe Programme 2007 - 2013

PRODUCTUION ACTIVITIES

Programme co-funded by the EUROPEAN UNION

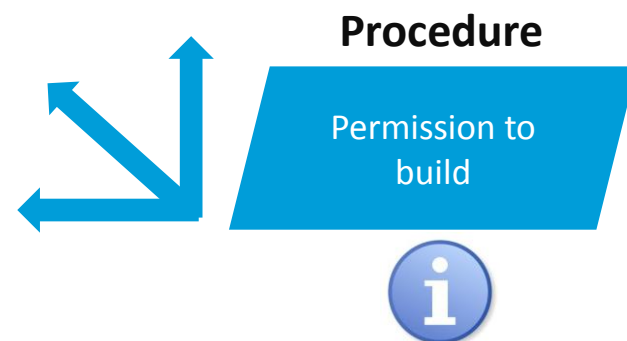

Funded by European Funds of South East Europe Programme 2007 - 2013

TYPES OF INTERVENTION

- ✓ New construction, expansion.
- ✓ Primary and secondary urbanization.
- ✓ Construction of infrastructure or equipment.
- ✓ Installation of towers, masts, towers.
- ✓ Installation of light manufactured, prefabricated, structures generally on private land to meet your not temporary needs.
- ✓ Implementation of measures in merit area qualified by PRG as new construction.
- ✓ Intervention for the implementation of a consistent volume of more than 20% of the volume of the main building.
- ✓ Construction of stocks of goods or materials, outdoor equipment for production activities which result in the permanent transformation of undeveloped land.
- ✓ Building renovation with:
 - changes in the volume, shape, prospects, Surface (including veranda);
 - recovery of the attics for habitation purposes;
 - change the intended use in a building in the homogeneous zone A;
 - Building renovation with change of intended use;

Programme co-funded by the EUROPEAN UNION

Funded by European Funds of South East Europe Programme 2007 - 2013

TYPES OF INTERVENTION

- ✓ Extraordinary maintenance (not covered by the case in art. 6, paragraph 2, letter a) of Presidential Decree 380/2001) recovery and rehabilitation as consolidation, restoration, renovation of the constituent elements inclusion of additional elements and the necessary facilities for the use of the property;
- ✓ building renovation (not covered by the case in art. 10, paragraph 1, letter c) of Presidential Decree 380/2001) which also includes the demolition and reconstruction with the same volume and shape;
- ✓ variations to the planning permission for works which are not affected by urban parameters and volumes, do not alter the intended use and construction category, do not alter the shape of the building and do not violate the requirements of the building permit.

Programme co-funded by the EUROPEAN UNION

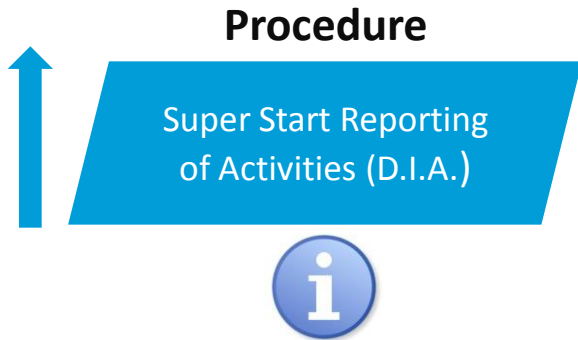

Funded by European Funds of South East Europe Programme 2007 - 2013

TYPES OF INTERVENTION

- ✓ heavy building renovation;
- ✓ new building or urban renewal, subject to implementation plans that contain specific provisions of sizes, types, formal and constructive;
- ✓ new development in the execution of PRG according to detailed measures.

Programme co-funded by the
EUROPEAN UNION

Funded by European Funds of South East Europe Programme 2007 - 2013

BUILDING PERMIT (1/5)

Activities subject to the procedure

Anyone wishing to make interventions of urban transformation and construction of the territory (as listed in Art. 10 (L) – works subject to planning permission of Presidential Decree 380/2001) and not to proceed with DIA second extension prepared by T.U. of laws and regulations on construction (DPR June 6, 2001 nr. 380).

- ✓ New construction, expansion.
- ✓ Primary and secondary urbanization.
- ✓ Construction of infrastructure or equipment.
- ✓ Installation of towers, masts, towers.
- ✓ Installation of manufactured light prefabricated structures generally on private land to meet needs that are not temporary.
- ✓ Implementation of intervention in the area qualified as a new PRG construction.
- ✓ Intervention that involves the creation of a volume greater than 20% of the volume of the main building.
- ✓ Construction of stocks of goods or materials, outdoor equipment for production activities which result in the permanent transformation of undeveloped land.
- ✓ Building renovation with:
 - changes in the volume, shape, prospects, Surface (including veranda);
 - recovery of the attics for habitation purposes;
 - change the intended use in a building in the homogeneous zone A;
- Building renovation with change of intended use;

BUILDING PERMIT (3/5)

CHARGES

There is an obligation for payment of the contribution of construction art. 16, "TU EDILIZIA"

DURATION / RENEWAL

- ✓The deadline for the start of work may not exceed one year from the issuance of the license; the period within which the work must be completed not more than three years of planning. Both terms may be extended for justified reasons (no longer attach documentation if the rules remained unchanged), for events beyond the control of the permit holder. After these deadlines, the permit ceases to right for the part not performed, except that, prior to maturity may request an extension. A longer period for the completion of the work may only be granted in consideration of the size of the work to be carried out or details of its technical and structural characteristics.
- ✓The part of the intervention that is not completed, must be made within the prescribed period and is subject to the issuance of new permit for the work remaining to be done, except that they do not fall within the values achievable in a complaint to login to the meaning of 'Article 22 (DPR 380/2001). This will include, where necessary, the recalculation of the contribution of construction.
- ✓The permit ends with different estimates of urban planning, except that the work has already begun and are completed within three years from the date of commencement.

S.C.I.A. (1/4)

Activities subject to the procedure

The conversion in law of economic measures - DL 78/2010 - introduces the SCIA: Reporting Certified of the start of activities in order to replace the "old" DIA.

The aim is to simplify the bureaucratic process that characterizes the permits and the acquire and obtaining the qualification to start some kind of work.

Works subject to SIGNAL START OF CERTIFIED ACTIVITY (S.C.I.A.)

- 1) Extraordinary maintenance (not covered by the case in art. 6, paragraph 2, letter a) of Presidential Decree 380/2001)
- 2) restoration and conservation as consolidation, restoration, replacement of components, accessories and insertion of elements of the necessary facilities for the use of the property;
- 3) building renovation (not covered by the case in art. 10, paragraph 1, letter c) of Presidential Decree 380/2001) which also includes the demolition and reconstruction with same size and shape;
- 4) variations to the planning permission for works which are not affected by urban parameters and volumes do not change the intended use and construction category, do not alter the shape of the building and do not violate the requirements of the building permit.

TIMES

The activity can be initiated from the date of submission of the SCIA

The PA, if it finds the lack of requirements and conditions, within 60 days of receipt of the SCIA, adopts measures motivated continuation of ban or the removal of potential harmful effects of it;

In the case of false declarations, the measures of prohibition / removal may also be used over a period of 60 days;

After a period of 60 days, the PA is allowed to intervene only with the risk of harm to the artistic and cultural heritage, the environment, health, etc.. (Article 19, c.4, Law 241/1990).

The contracting authority may still take self-defense determination to withdraw or cancel office.

CHARGES

There is an obligation for payment of the contribution of construction ex art. 16, TU CONSTRUCCION

PENALTIES

Are the same penalties provided for administrative, criminal and civil arranged for interventions with the Building Permit, including, for example:

sanctions breakers or scaler (Art. 31 TU Construction)

penalties and fines for the demolition of restructuring heavy construction

penalties and fines for the demolition work performed in partial differences (art. 34, Van TU)

criminal penalties (art.44, TU Construction)

invalidity of legal acts (art.46, TU Construction)

Environmental Impact Assessment (V.I.A.)

The V.I.A. administrative procedure is a technical test of environmental compatibility of a project introduced at European level with the EEC Directive 337/85 and integrated with the Directive 11/97/CE.

The V.I.A. is a decision support tool aimed at technical and political: to improve the transparency of public decision allowing the definition of a financial benefit-harm, not just the ecological-environmental, but also from the economic, social, aimed at optimal management of resources ;

The procedure

The V.I.A. procedure involves the presentation by a proposer, public or private project accompanied by Environmental Impact Assessment (for the V.I.A. procedure) and the preliminary environmental report (for the verification phase of being subject) to the Competent Authority and the contemporary public notice by publication in the newspaper, on BURM and on the website of the Authority responsible for public consultation, which can be expressed written comments within the time allowed by the standard.

Programme co-funded by the
EUROPEAN UNION

Funded by European Funds of South East Europe Programme 2007 - 2013

Endoprocedure in the presence of constraints or specific interventions (3/6)

The Administration, taking into account the comments received as part of the evaluation process, request clarifications and additions to the applicant.

The assessment phase ends with the decision formalized through the enactment of a measure (DGR for the procedure and Legal Leadership for being subject to verification) that can contain, and usually contains, including requirements and recommendations to be developed in subsequent phases of planning and execution. The assessment is followed by a verification of compliance levels following the requirements and design phase of a monitoring and control.

LEGISLATION (1/3)

CODE OF CULTURAL HERITAGE AND LANDSCAPE

Legislative Decree No. 42, January 22, 2004

Code of the cultural heritage and landscape "in accordance with Article 10 of the Law of 6 July 2002, 137

<http://www.normattiva.it/uri-res/N2Ls?urn:nir:stato:decreto.legge:2004-01-22:42>

The Code contains all the rules on cultural heritage and landscape since 1939. It provides a very important instrument for the protection and promotion of Italian cultural heritage.

The main reference is the art. 9 of the Italian Constitution, which says that "The Republic promotes the development and protection of the cultural landscape of national historic and artistic heritage."

This is a legislative measure adopted under Article. 10 Law of July 6, 2002, No. 137, which literally has the responsibility for the reorganization and consolidation in the field of environmental and cultural heritage.

The Code is intended primarily an adaptation of our legal system to EU legislation and international agreements.

Provides, inter alia certain criteria:

"... Update the tools of detection, protection and preservation of cultural and environmental assets, including through the establishment of foundations open to the participation of regions, local authorities, public and private

".... Introducing the concept of landscape as a cultural heritage with an aesthetic quality to be preserved, not only for its natural components, but also and especially anthropogenic ones."

LEGISLATION (2/3)

SINGLE TEXT OF BUILDING

Decree of the President of the Republic No 380, June 6, 2001

<http://www.normattiva.it/uri-res/N2Ls?urn:nir:stato:decreto.legge:2001-06-06;380>

The Decree 380/2001 of the President of the Republic, more commonly known as a single text in their building, collects amending and supplementing the foregoing provisions of law on construction.

The text contains only the basic principles and general provisions for the discipline of building.

The regions exercise the legislative power shared in their building while respecting the fundamental principles of state law can be derived from provisions in the text only.

The new text only on construction, has put some order in the numerous laws regulating the construction activities, and introducing some major changes.

The single text provides only two classes of securities qualified for the execution of construction projects: the building permit and the reporting of business start (better known as dia).

Simplification of procedures that must undergo anyone who wants to undertake a trade, business or craft, stating that "every act of authorization, license, grant is not constitutive, permit or cleared however denominated, including applications for entries in books or roles required for the pursuit of business, trade or craft, the issue of which depends exclusively on the finding of the requirements and conditions prescribed by law or by administrative measures to contain the general ... "is" replaced by a report submitted by ... "or SIGNAL START OF CERTIFIED ACTIVITY (S.C.I.A.).

- * **construction in the D.I.A. is replaced by S.C.I.A.**
- * **the work can begin on the day of reporting**

What is specified is that the trail makes it possible to start work on the same day of submission of the report to the competent authority, without having to wait the 30 days set aside for the DIA.

In addition, the notification must be accompanied by the attestations and assertions of qualified technicians related to the maintenance of the requirements of the law, they must be accompanied by all the technical drawings which should then allow the agencies to carry out the necessary checks . In the event of default by the applicant within 60 days of receipt of the report, the Board shall adopt "measures motivated continuation of ban or the removal of potential harmful effects of it. " After this time, the Administration may intervene only if there is danger of harm to the artistic, cultural and environmental, health, public security or national defense.
